

External Quality Assessment Program for **Francisella tularensis, antibodies**

Labquality is announcing a new EQA scheme for Francisella tularensis, antibody detection. Each round will provide two one-donor serum or plasma samples. The samples should be treated and analysed as regular patient samples. The participants submit their results through the electronic platform LabScala and results are processed by the EQA coordinator. Result evaluations including comments by the Scheme Expert will be published in the final report distributed to the participants.

Round 1, 2021 in June 2021 will be a pilot study free of charge for a limited number of participants. Round 2, 2021 in October will be chargeable. Registration includes participation in both rounds.

5851 Francisella tularensis, antibodies

- Samples:** 2 serum/plasma samples (0.5 mL/sample)
Distribution: 1, 2021 June – pilot study free of charge
2, 2021 October – for pricing please contact your local distributor or Labquality's customer service
